Application/Control Number: 10/646,919

Art Unit: 1653

Claims 1-9 have been canceled New Claims 10 and 11 are currently pending and are subject to restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim 10, drawn to a zinc finger nucleotide binding polypeptide comprising 2 to 6 nucleotide binding regions selected from SEQ ID NOs: 17-110, classified in class 530, subclass 300.
- II. Claim 11, drawn to a composition comprising 2 to 12 nucleotide binding regions selected from SEQ ID NOs: 17-110, classified in class 514, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

SEQ ID NOs: 17-110 differ in structure and in function. Therefore, these sequences are considered to be patentably distinct. Claims 10 and 11 have been separated because the polypeptide comprises 2 to 6 nucleotide binding regions selected from SEQ ID NOs: 17-110 within a single polypeptide sequence, while Claim 11 is drawn to a composition of individual peptides selected from SEQ ID NOs: 17-110.

If Applicants elect Group 1, Claim 10, Applicants must also elect 2 to 6 sequences selected from SEQ ID NOs: 17-110. It will be understood that any of the SEQ ID NOs: 17-110 elected by Applicants will be found within the same polypeptide sequence.

If Applicants elect Group II, Claim 11, Applicants must also elect 2 to 12 sequences selected from SEQ ID NOs: 17-110. It will be understood that any of the SEQ ID NOs: 17-110 elected by Applicants will be found as individual, unconnected, peptides within the same composition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/646,919

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Cochrane Carlson, Ph.D. whose telephone number is 571-272-0946.

The examiner can normally be reached on 7:00 AM - 4:00 PM, off alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Jon Weber can be reached on 571-272-0925. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
